Holly,

I would put it this way:

The commenter feels that the Class VI program should be run under section 1425 like Class II programs, instead of the more prescriptive section 1422 program. This would allow the states more freedom to run their program as they saw fit, while still ensuring USDW protection.

Hi Craig,

I am working on drafting program updates to share at the GWPC meeting. How would you characterize this comment in one or two sentences for use at the State-EPA roundtable? Thanks!

Holly,

This came in late yesterday. Lisa was already cc on the original.

We now have a total of 3 commenter's.

The Carbon Sequestration Council (CSC) is pleased to submit these comments on the complete program revision package from the State of North Dakota requesting approval of a revision to its section 1422 Underground Injection Control (UIC) program to include Class VI primacy. 78 Fed. Reg. 48639 (August 9, 2013).

Best Regards,
Bob
